

INTRODUCING

RPET19

STICK WITH RECYCLED PLASTIC!

PATENTED HOT MELT
ADHESIVE CARTON
SEALING TAPE

CONTAINING OVER 85% RECYCLED PET
SOURCED FROM WASTE PLASTIC BOTTLES

TAPING WITH BI-ORIENTED POLYETHYLENE TEREPHTHALATE (BOPET)

RECYCLING RESPONSIBLY

The patented backing of **RPET19** tape contains over 85% recycled PET; sourced entirely from waste plastic bottles, and currently considered one of the most eco-friendly plastic tape options on the market compliant with UK plastic tax legislation.

LONGER AND STRONGER

BOPET is naturally stronger than Bi-oriented Polypropylene (BOPP), which allows **RPET19** to be produced with a 24% thinner backing compared to BOPP. The 19mu BOPET backing allows extra metres per roll without increasing overall roll dimensions, so can be used on existing taping machinery and dispensers without modification.

INCREASED EFFICIENCY, REDUCED WASTE

With more metres of tape per roll, overall downtime attributed to roll changes is reduced, improving production efficiency. Reduced roll numbers also equates to less packaging and core waste, decreasing volume and handling costs.

HAND TAPE SPECIFICATIONS

48mm x 150m

MACHINE TAPE SPECIFICATIONS

38mm x 990m, 38mm x 1500m; 48mm x 990m, 48mm x 1500m; 75mm x 990m, 75mm x 1500m

TAPE COLOURS

Clear, Brown, White & Printed White (up to 8 colours)
